Innovative Clean Energy Funding The SolarCrowdFund.com Team is made up of a group of professionals from very diverse backgrounds, including Renewable Energy Development, Investment Banking, Project Finance Experts, Insurance and Risk Professionals, Entrepreneurs, and Investors. Our goal is to finance and build grid connected utility scale solar farms through pooled funding of accredited investors. We have been there and done that, a team that has developed grid connected utility scale solar farms that are operational. Pure greenfield development from start to finish, we bring our technical skills and financial creativity to pooled solar funding. We embrace all investors small or large the same way, providing them with safe, high returns in the energy investment marketplace. We bring with us a impeccable reputation for doing things right and getting the job done right the first time. Our reference base of civic leaders, contractors, landowners, business associates and government agencies all will attest to our capabilities, qualifications and integrity. We currently are developing multiple projects, but we are also looking to partner with other developers. If you have a utility scale solar development in it's early, mid, late stage or shovel ready without financing or a PPA, please contact our Development Manager. We will do our best to evaluate your project and give you a quick answer on the feasibility for pooled funding using our proprietary model. For future investment inquiries, please contact our Investor Relations. You can see our last successful development by visiting our Facebook Page or our Website We are committed to reducing greenhouse gases, limiting air pollution, increasing energy security and delivering exceptional risk managed returns to our future investors.
